

Unit	Objective	Learning Outcomes	Subject Content	Teaching Learning Methods	TIME	
					Theory	Practical
1.	Develop the skills needed to manage and manipulate images using the Adobe Photoshop Package.	- Describes the subject area of image editing. - Opens and saves an image. - Selecting a section of an image using proper selection tool. - Inverts, modifies and transforms the selection. - Saving the selected section and loads it back.	Image Editing with Adobe Photoshop Adobe Photoshop 1. Introduction - What is Adobe Photoshop - Image Editing Concepts - Usage of Photoshop - Starting Adobe Photoshop - Opening an image - Components of the Photoshop main window. - Saving files 2. Selection - Selection Tools- Move, Marque, Lasso, Magic Wand, Quick Mask, Quick Selection, Pen, Crop - Deselect - Inverse Selection - Transform Selection - Modifying the Selection - Refining the edge - Save Selection - Load Selection	- Lecture - Demonstration - Individual Activities	30	54

		• Understands the differences and uses of different color modes. • Selecting and applies a suitable color mode. • Creates and edits a multi-layer image. • Manages the layers using copying, deleting, hiding. • Combines Layers Converts a layer to a Smart object. • Applies adjustments to an image • Selects a suitable brush, modifies an existing brush or creates a new brush.	<u>3.Color Settings</u> 3.1. Color Modes – Bitmap, Greyscale, Indexed Color, RGB, CMYK 3.2. Color Depth 3.3. Color Profiles – RGB, CMYK, Greyscale. <u>4.Layers</u> 4.1. Layer Management –Creating, duplicating, deleting, hiding and locking layers. 4.2. Rasterizing Layers 4.3. Layer Styles – Use, Copy, Paste & Clear Customize. 4.4. Combining Layers – Merge, Flatten 4.5. Convert to Smart Object <u>5.Adjustments</u> 5.1. Basic Adjustments - Brightness, Contrast, Levels, Exposure, 5.2. Color Adjustments - Hue/Saturation, Color Balance, Curves, Black and White, Invert, Selective Colors, Desaturase, Replace and Match Colors <u>6.Painting</u> 6.1. The Brush Tool 6.2. Preset Brushes 6.3. Customizing an Existing Brush 6.4. Making a Custom Brush 6.5. Loading Brushes 6.6. Saving Brushes 6.7. Brush Modes	• Lecture • Demonstration • Individual Activities		
--	--	---	---	---	--	--

		• Applies effects to a selected area of an image. • Retouches an image by cloning, healing and patching. • Removes red-eye effects from photos. Warps an image section. • Defines a mask, applies it to an image. • Paints and edits the image section selected by the mask. • Selects and applies a filter to an image. • Blends two images using a suitable blending mode. • Applying a gradient if necessary.	<u>7. Effects</u> 7.1. Blur 7.2. Sharpen 7.3. Smudge 7.4. Dodge 7.5. Burn 7.6. Sponge <u>8. Modifying Images</u> 8.1. Cloning 8.2. Pattern Stamp 8.3. Healing Brush 8.4. Patching 8.5. Red Eye Removal 8.6. Warps – Puppet, Perspective, <u>9. Masks</u> 9.1. Defining a Mask 9.2. Clipping Mask 9.3. Applying a Mask 9.4. Changing Mask Colors 9.5. Painting and editing inside selection <u>10. Filters</u> 10.1. Lens Correction 10.2. Liquify Filter 10.3. Using Filters – 3D, Blur, Distort, Noise, Pixelate, Render, Sharpen, and Stylize, Video. <u>11. Blending</u> 11.1. Blending Modes 11.2. Gradient effects 11.3. Editing Gradient effects	• Lecture • Demonstration • Individual Activities		
--	--	---	--	---	--	--

		• Draws shapes on the image. • Loads custom shapes and uses them. • Setup a graphics for printout using suitable printing methods. • Export graphics publish for web.	<u>12.Drawing Shapes</u> 12.1. Shape tools 12.2. Shape Options 12.3. Creating and Loading Custom Shapes 12.4. Preset shapes 12.5. Styles 12.6. Copying Layer Styles <u>13.Printing & Publishing</u> 13.1 Print 13.2 Page Setup 13.3 Contact Sheet 13.4 Picture Package 13.5 Saving an Image for web.	• Lecture • Demonstration • Individual Activities		
--	--	--	---	---	--	--

Unit	Objective	Learning Outcomes	Subject Content	Teaching Learning Methods	TIME	
					Theory	Practical
2.	Achieves the skills needed to create, modify and manage vector graphics using the CorelDraw package.	• Launching CorelDraw software & identifies CorelDraw User Interface Basic. • CorelDraw Management tools. • Creating basic shapes & manages their colors	2. Create & Edit Illustrations with CorelDraw <u>1.Introduction</u> 1.1. Introduction and Start up CorelDraw program 1.2. Describing CorelDraw window (Workspace) 1.3. Explain the tool box 1.4. View modes 1.5. Zooming tools 1.6. Start a new Document 1.7. Saving an Illustration 1.8. Opening an Illustration 1.9. Importing files 1.10. Exporting an Illustration <u>2.Shapes and lines</u> 2.1. Shapes 2.1.1 Creating basic shapes (Rectangle, Ellipse, Polygon, Stars etc.) 2.1.2 Controlling shapes (Scaling, Moving, Rotating, Skewing) 2.1.3 Snap to object and snap to guideline 2.2. Lines 2.2.1. Open and closed paths and their components 2.2.2. Creating straight and curve lines in Pen, Bezier and Polyline tools 2.2.3. Modifying paths using shape tool and property bar commands (Select, Insert and Delete Nodes) 2.2.4. Nodes and line segment types 2.3. Applying Convert To Curve command to the shape 2.4. Adding and removing colours or fill effects (Fountain Fill, Texture Fill and Pattern Fill etc.) to shape 2.5. Adding and removing colours to lines and setting line width and style	• Lecture • Demonstration • Individual Activities	25	45

		Transforms & Edits shapes.	<u>3.Working with objects</u> 3.1. Editing objects 3.1.1. Copy 3.1.2. Duplicate 3.1.3. Clone 3.1.4. Step and Repeat 3.2. Arranging objects 3.2.1. Lock and Unlock 3.2.2. Group and Ungroup 3.2.3. Align and Distribute 3.2.4. Object stacking order commands (To Front of Page, To Back of Page, Forward One, and Back One, In Front Of, Behind etc.) 3.3. Reshaping shaping objects (Combine, Weld, Trim, and Intersect etc.) 3.4. Converting Outlines to Objects 3.5. Applying some effects to objects 3.5.1. Artistic media 3.5.2. Blend 3.5.3. Contour 3.5.4. Extrude 3.5.5. Bevel 3.5.6. Lens			- Lecture - Demonstration - Individual Activities
		Type text in CorelDraw and edit typed text word & Paragraphs.	<u>4.Working with Text</u> 3.6. Artistic Text and Paragraph Text 3.7. Formatting text 3.7.1. Character formatting 3.7.2. Paragraph formatting 3.7.3. Change case 3.8. Inserting symbol characters (©, ™, ® etc.) 3.9. Converting text 3.9.1. Convert Artistic Text to Paragraph Text 3.9.2. Convert Paragraph Text to Artistic Text 3.10. Fit Text to Path 3.11. Applying Convert to Curve command to text			

		• Get raster image to CorelDraw and edit bitmap (raster) images. • Setup a graphics for printout using suitable printing methods.	<u>5.Working with bitmaps</u> 5.1. Converting vector graphic to raster graphic using Convert to Bitmap command 5.2. Setting the Resolution of a bitmap 5.3. Setting Colour Mode of a bitmap 5.4. Adjusting colours, Brightness and Contrast of a bit map using Image Adjustment Lab dialog box 5.5. Applying Trace Bitmap command to a bitmap 5.6. Removing colours of a bitmap using Bitmap Colour Mask command 5.7. Appling some bitmap effect to bitmap (3D, Distort, Blur etc.) <u>6.Printing the Graphic</u> 6.1. Setting the page of a graphic 6.2. Creating labels 6.3. Printing the full graphic 6.4. Printing a part of a graphic	• Lecture • Demonstration • Individual Activities		
--	--	--	---	---	--	--

4.	Achieves skills needed to create, modify and manage documents with text and graphics with the Adobe InDesign Package	- Describes the subject area of Desktop Publishing. - Open and saves an image. - Describes about using different tools in tool panel. - Creates master pages and edit master pages . - Type text in InDesign and edit typed text word & Paragraphs. - Creates Text frames and edit.	<u>4. Desktop Publishing with InDesign</u> <u>Adobe InDesign</u> <u>1.Introduction</u> 1.1. What is Adobe InDesign 1.2. Starting Adobe InDesign 1.3. Opening Documents 1.4. Identify InDesign main Window 1.5. Saving Files 1.6. Creating Up a New Publication <u>2.Toolbox</u> 2.1. Using Tools 2.2. Opening and Closing the Tool Panel <u>3.Creating Master Page</u> 3.1. Creating and Applying Master Pages 3.2. The Pages Panel 3.3. Creating a New Master Page 3.4. Applying a Master Page to Document Pages 3.5. Using Ruler Guides <u>4.Text Fundamentals</u> 4.1. Adding Text 4.2. Using the Type Tool 4.3. Dragging Text 4.4. Importing Text with the place dialog box 4.5. Text Frames 4.6. Creating text frames on master page 4.7. Creating a Master text frames 4.8. Drawing additional text frames 4.9. Creating text frames on master pages 4.10. Adjusting Columns 4.11. Adjusting Columns in text frames 4.12. Managing, Spacing and Alignment	- Lecture - Demonstration - Individual Activities	25	45

		• Describes Formatting Characters • Converts text in to shape	<u>5.Specifying Character Attributes</u> 5.1. Working with Character Formats 5.2. The Control Panel 5.3. Changing Font Family, Font Style 5.4. Changing Font size 5.5. Applying other character formats 5.6. Horizontal scale and Vertical Scale 5.7. Baseline Shift 5.8. Skew (False italic) 5.9. All Caps and Small Caps 5.10. Superscript and Subscript 5.11. Underline and Strikethrough 5.12. Leaving Space between Characters and Lines 5.12.1. Kerning 5.12.2. Tracking 5.12.3. Leading 5.13. Adjusting Character strokes 5.14. Converting text in Shapes 5.15. Making text follow a path <u>6.Specifying Paragraph Attributes</u> 6.1. Understanding Paragraph Basic 6.2. Alignment 6.3. Indents 6.4. Adding space between Paragraphs 6.5. Using Drop Caps 6.6. Applying basic Drop Caps 6.7. Paragraph rules 6.8. Using Bulleted and Numbered List <u>7.Setting Up Styles</u> 7.1. Paragraph Styles 7.2. Creating Paragraph Styles 7.3. Applying Paragraph Styles 7.4. Overriding existing Formatting 7.5. Managing Paragraph Styles 7.6. Character Styles 7.7. Creating Character Styles 7.8. Working with Nested Styles 7.9. Creating Nested Styles 7.10. Wrapping text around objects 7.11. Using the Text Wrap panel 7.12. Contour Option	• Lecture • Demonstration • Individual Activities		
--	--	--	--	---	--	--

		- Describes Create, Edit, and formatting tables - Describes Special Components using in InDesign - Manipulating Objects and Pages	<u>8.Setting Up Tabs and Tables</u> - Using the Tabs Panel - Tab Style Buttons - Position panel above Text frame button - Flyout Menu - Creating Tables - Creating a Table - Formatting the Table - Table Option dialog box - Working with Rows and Columns - Working with cells - Converting Tabs to table <u>9.Special Components</u> - Undoing what you've just done - Undo - Redo - Revert - Zooming and scrolling - Zoom Option in the view menu - Working with multi page documents - Adding pages - Deleting pages - Copying and moving pages - Working with page numbers - Working with layers - Creating Layers - Working with object on layers - Moving objects to different Layers - Colors - Creating colors using Swatch panel - Creating tints - Creating Gradients - Copying Color from image - Applying color Transparency - Adding Corner effects - Stacking Objects - Group Objects - Ungroup Objects - Locking Objects - Searching and Replacing	- Lecture - Demonstration - Individual Activities		
--	--	---	---	---	--	--

		• Setup a graphics for print out using suitable printing methods.	<u>10.Printing Documents</u> 10.1. Selecting InDesign printing options 10.2. Common Option 10.3. General Pane 10.4. Setup Pane 10.5. Planning Your Book 10.6. Creating and Opening Book 10.7. Adding Chapter to books 10.8. Setting up Booklet 10.9. Printing Booklet	• Lecture • Demonstration • Individual Activities

ඇගයීම් ක්‍රමවේදය

පරිගණක විත්‍රක පාඨමාලාවේ අවසාන පරීක්ෂණය

පරිගණක විත්‍රක පාඨමාලාවේ අවසාන පරීක්ෂණය සඳහා ප්‍රශ්න පත්‍ර සැකසීම පහත නිර්ණායක අනුව සිදු කළ යුතුය. න්‍යායාත්මක කොටස් න්‍යායාත්මක පරීක්ෂණයකින්ද ප්‍රායෝගික කොටස් ප්‍රයෝගික පරීක්ෂණයක් මගින් ඇගයීමකට ලක් කළ යුතුය. ප්‍රශ්න සකස් කළ යුතු ආකෘතිය හා ලකුණු ලබා දීමේ ක්‍රමවේදය පහත ලබාදී ඇත.

ලිඛිත පරීක්ෂණය -

ලිඛිත පරීක්ෂණය සඳහා ලබා දෙන සම්පූර්ණ ලකුණු ප්‍රමාණය ලකුණු 100 වේ.

i. කොටස - බහුවරණ ප්‍රශ්න පත්‍රය

බහුවරණ ප්‍රශ්න 40 කින් සමන්විතවේ. පාඨමාලාවේ න්‍යායාත්මක කොටස ප්‍රශ්න 20 ක් මගින් ආවරණය කළ යුතු අතර ප්‍රායෝගික කොටස් ඉතිරි ප්‍රශ්න 20 මගින් ආවරණය කෙරේ. එක් ප්‍රශ්නයකට ලකුණු 1 බැගින් ප්‍රශ්න 40 සඳහා ලකුණු 40 ලැබේ (ලකුණු $1 \times 40 = 40$)

ii. කොටස රචනාමය- ප්‍රශ්න පත්‍රය

රචනාමය ප්‍රශ්න පත්‍රය ප්‍රශ්න 8 කින් සමන්විත වන අතර පළමු ප්‍රශ්නය අනිවාර්ය අතර ප්‍රායෝගික කොටස් ආවරණය වන පරිදි සකස් කළ යුතුය. ලකුණු 10 හිමි වේ. ඉතිරි ප්‍රශ්න 7 න්‍යායාත්මක කොටස් අනුසාරයෙන් සැකසිය යුතුය. එම ප්‍රශ්න 7න් තෝරාගත් ඕනෑම ප්‍රශ්න 5කට පිළිතුරු සැපයිය යුතුය. එම ප්‍රශ්න සඳහා එක් ප්‍රශ්නයකට ලකුණු 10 බැගින් ලකුණු 50 ලැබේ.

ප්‍රායෝගික පරීක්ෂණය-

ප්‍රායෝගික පරීක්ෂණය සඳහා ලබා දෙන සම්පූර්ණ ලකුණු ප්‍රමාණය ලකුණු 100 වේ.

ප්‍රශ්න පත්‍රයේ ලබා දී ඇති නිර්ණායක අනුව නිර්මාණශීලීව Vector සහ Raster රූප සංයෝජනය කොට සපයා ඇති සම්පත් උපයෝගී කොට ගනිමින් නිර්මාණයක් සිදුකිරීම (ලකුණු 100)

$$\text{අවසාන ලකුණු ලබා දීම} \quad - \quad \text{ලිඛිත පරීක්ෂණය ලකුණු} \times 40/100 + \text{ප්‍රායෝගික පරීක්ෂණය ලකුණු} \times 60/100$$

On The Job Training

Practical Training for 06 months in relevant capacity

Obtaining NVQ

After competency the part time course with 5 years' experience in the same capacity can get NVQ Level 04.
