Microsoft excel for finance • Logical, athematic functions • Formatting and validations • Financial, lookup functions • Goal seek • What-if analysis • Array functions • Data table	learning, Demonstrations & Assignments	10	10

ABSTRACT

This is a specialized course that provides a comprehensive theoretical and practical knowledge in the application of a selected accounting software (e.g. Sage line 50, Quick Book, MYOB etc.) in business data processing with a view to produce financial statements for both internal and external users of accounting information and to generate reports that will be of value for managers in the decision making process. This course provides students with the knowledge of creating charts of accounts in order to structure the accounting process. Students are given hands on experience of codifying accounts appropriately and entering transactions into the accounting system through various modules namely creditors, debtors, general ledger, inventory, payroll, fixed assets and budget analysis. Integration of all the modules in the accounting system and personalization of accounting systems to suit the information needs of different types of organizations are also covered.

CORE OBJECTIVES

The aim of the qualification is to develop candidates' competence in using computerized

Accounting software to produce accurate, professional and well-presented accounting

Information employing an appropriate range of accounting procedures. It particularly aims to

Develop skills in:

- Setting up initial business data in difference computerized accounting systems
- Processing and completing advanced business transactions using difference accounting systems
- Producing and analyzing end period reports using difference accounting systems

Producing and reviewing a range of routine and non-routine accounting reports for management purposes.

Target audience

This qualification is suitable for people who work or intend to work in an accounting role
Which requires the computerized processing and completion of advanced accounting
Transactions and the preparation of end period reports.

Entry requirements

"Candidates for this qualification must have book-keeping and
Accounting knowledge and skills equivalent G.C.E. O/L as a subject of accounts
Or G.C.E.A/L commerce or above"

English requirements

There are no formal entry requirements for this qualification. However, candidates should
Have a minimum level of English equivalent to the G.C.E. O/L or above

Assessments and examination

"According to the rules and regulations of national youth services council's
Examination departments"

Examination criteria

Theory- 3 hours	100%
Practical- 2 hours	100%
Assignments	100%
